

1 Quick Start – SVMultln

1.1 Initializing the Class

To format a *document for a – Springer Lecture Notes of the Institute for Computer Sciences, Social-Informatics and Telecommunications Engineering series*.
– enter

Tip:
Use the pre-set
templates

`\documentclass[lnicst]{svmultln}`

at the beginning of your root file; telling the document class to activate the additional option for LNICST volume (using the file “svlnicst.clo”). This will set the text area to a `\textwidth` of 12.2 cm or 4.8 in and a `\textheight` of 19.3 cm or 7.6 in with a `\headsep` of 12 pt (space between the running head and text).

N.B. Trim size (physical paper size) is 15.5×23.5 cm or $6\frac{1}{8} \times 9\frac{1}{4}$ in.

1.2 Required Packages

The following selection in the past has proved to be essential in preparing a fully formatted (i.e. ready-to-print) manuscript.

Invoke the required packages with the command

`\usepackage{}`

`graphicx.sty` is a powerful tool for including, rotating, scaling and sizing graphics files (preferably *.eps files)
